

PROYECTO ABRAZOS

Sponsors for children living in families affected by Huntington's disease in Colombia

PROYECTO ABRAZOS

Sponsors for children living in families affected by Huntington's disease in Colombia

1. Together with the local patient associations in Colombia

- We gather information about the children
 - Age and gender of the child
 - Birthdate – all children are under 15 years of age
 - Conditions of the family
- Frequency of donations – current proposal is delivering donations twice a year: summer and Christmas season
- We will be sending them gifts for their birthdays
- You will get a card with their name and pic after you sponsor a child
- The identity of the families and the children remain anonymous. We commit to respecting their privacy and protecting their identity, and we will not publish their pictures
- The patient associations will keep a record of all donations and receipts
- The associations will enquire about other items not described above for which the kids have a particular desire to obtain or do, and will work hard to make these happen

2. Annual costs – at the moment we are asking for a US\$300 donation per child. But you can donate any amount you can!

3. How to donate

- The donations can be made directly to <https://www.gofundme.com/23gux7w>

4. How do the donations reach the families

- The local patient associations buy and deliver the items designated for each child
- The associations will document the delivery of the donations and will provide Factor-H with videos or photographs. Factor-H will then send these to the sponsors
- The associations will facilitate direct communication between the sponsors and the children (via letters or emails, when possible)
